Jedzte mäso s mierou!

Ak jete mäso, pouvažujte o obmedzení jeho konzumácie a namiesto množstva hľadaj kvalitu. Pri produkcií mäsa sa spotrebuje obrovské množstvo energie nielen na pestovanie a prepravu krmiva pre zvieratá, ale aj na vykurovanie, vetranie a osvetlenie fariem na chov hospodárskych zvierat. Ak budete jest menej mäsa, pomôžete nielen životnému prostrediu, ale aj svojmu zdraviu. Najlepšie je kúpať potraviny od miestnych výrobcov, ideálne organické potraviny.

Climate Change Quiz

How would you define climate as opposed to weather?

- Weather includes climate.
- Climate and weather are two words for the same thing.
- Climate is the average pattern of weather, that is, average quantities of temperature, rainfall or wind, in a given region over a long period of time, ranging from

Zistite, ako môžete znížiť vplyv vašich každodenných činností na životné prostredie, či už doma, v práci alebo na cestách.

Bud'te v pohybe! — 15. 07. 2008

Namiesto jazdy automobilom chodte pešo, na bicykli, autobusom alebo metrom. Udržte sa v dobrej kondícii a navyše pomôžete obmedziť dopravu, znečistenie ovzdušia, hluč a počet nehôd.

Musíte ísť niečo vybavit? — 15. 07. 2008

Autá často znečisťujú viac pri jazde na krátke vzdialosti, keďže motor studený. Preto radšej chodte pešo alebo na bicykli.

Nezanedbávajte pravidelné kontroly auta. — 15. 07. 2008

Pravidelne kontrolujte, kolko emisií vypúšťa vaše auto. Katalyzátory vyžadujú pravidelnú údržbu.

Chodíte do zamestania? — 15. 07. 2008

Uvažujte o zdielaní automobilu alebo hromadnej doprave namiesto jazdy vlastným autom. Ak jazdite autom, spýtajte sa, ktorý z kolegov býva blízko vás, a či by ste sa nemohli dohodnúť na spoločných jazdach.

Nákup nového auta si dobre rozmyslite! — 15. 07. 2008

Využitie alternatívnych foriem dopravy by mohlo byť efektívnejšie ako vlastniť auto len kvôli víkendovým výletom.

Využite služby doručovateľov na bicykli! — 15. 07. 2008

Ak podnikáte a musíte pravidelne po meste roznášať poštu a balíky, využite služby doručovateľa na bicykli (ak je to možné). Bicykle obchádzajú dopravu, sú rýchle a prispiejete tým k zlepšeniu kvality mestského ovzdušia vo vašej oblasti.

Vedeli si, že recykláciu odpadu môžete znížiť znečistenie ovzdušia? — 15. 07. 2008

Ak budete recyklovať sklo, papier, batérie, motorový olej a hliníkové plechovky, tieto materiály môžu byť opäť využité a tým znížite objem spalovaného odpadu až o 70 %.

Ked' je vonku veľmi teplo, nejazdite autom, ale použi hromadnú dopravu. — 15. 07. 2008

Výfukové plyny z auta môžu reagovať so slnečným svetlom a vytvoriť tak znečisťujúce plyny, napr. ozón z troposféry. Ide o hlavnú príčinu nízkej kvality ovzdušia a zložku fotochemického smogu, ktorý môže spôsobiť dýchacie ťažkosti.

Skôr ako si kúpite športové auto (SUV), zamyslite sa. — 15. 07. 2008

Prevádzka športových áut je veľmi drahá a navyše sú neefektívne z hľadiska spotreby paliva. Vypúšťajú dvakrát viac oxidu uhlíkatého, uhľovodíkov a oxidu dusného ako priemerné autá. Tieto chemikálie sa podielajú na znečistení ovzdušia rovnako ako globálne oteplovanie.

Zatvorte vodovodnú kohútik! — 15. 07. 2008

Environmental Atlas Of Europe

The Environmental Atlas of Europe is a UNEP-EEA-European Space Agency joint project showcasing communities responding to environmental change across Europe.

The screenshot shows the homepage of the Environmental Atlas of Europe. At the top, there's a banner with the text "The Environmental Atlas of Europe is a UNEP-EEA-European Space Agency joint project showcasing communities responding to environmental change across Europe." Below the banner, the main title "Environmental Atlas of Europe" is displayed, along with logos for UNEP, esa (European Space Agency), and EEA (European Environment Agency). A sidebar on the right contains buttons for "Stories", "Share", and "Settings", and lists "Denmark" and "Baltic" under the "Stories" section. A scale bar at the bottom right indicates "2500 Kilometers". The central part of the page features a satellite map of Europe with numerous orange location markers. A zoom control on the left side includes a small inset map of Europe and a "bing" logo with a "Road" button. A copyright notice at the bottom states "© 2010 Microsoft Corporation Image courtesy of NASA".

The films present a series of these inspirational stories about how people are responding to climate change and in so doing, transforming their lives for a more sustainable future.

A Day in my Forest

Silent except for the humming of bees and the distant hammering of woodpeckers, Białowieża Forest is a fairy-tale landscape of tall trees, peat bogs and meadows – home to innumerable species of birds, invertebrates, lichens, fungi and other flora and fauna including grey wolves, lynx, elk and a large herd of rare European bison.

"About a thousand years ago, all our countries were covered by woods like this."

Mateusz Szymura, Białowieża National Park Nature Conservation Team

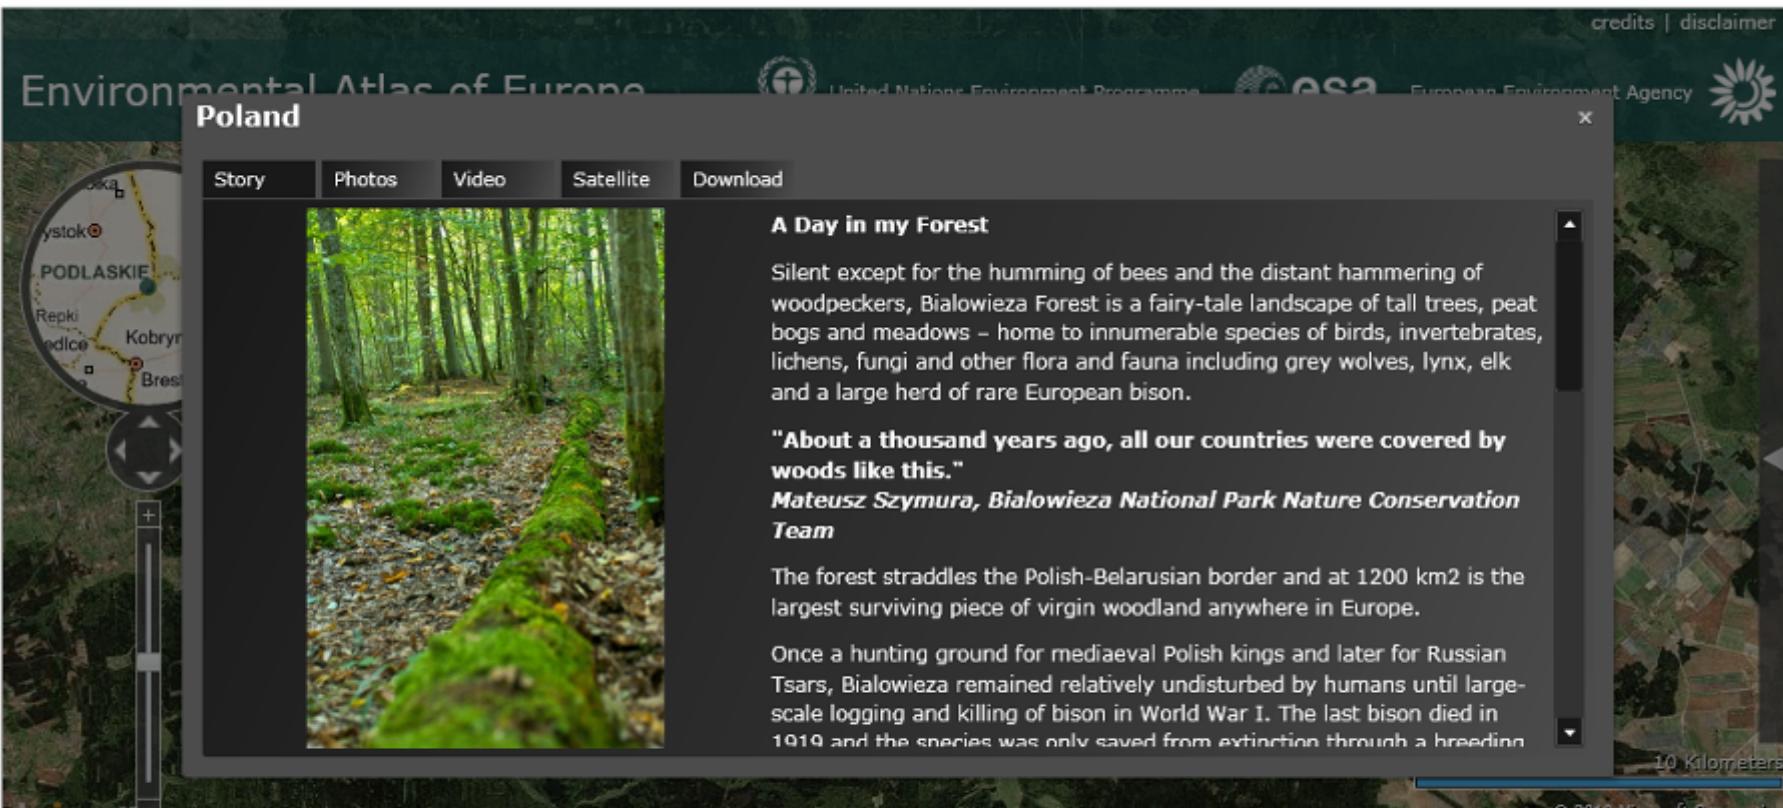

The forest straddles the Polish-Belarusian border and at 1200 km² is the largest surviving piece of virgin woodland anywhere in Europe.

Once a hunting ground for mediaeval Polish kings and later for Russian Tsars, Białowieża remained relatively undisturbed by humans until large-scale logging and killing of bison in World War I. The last bison died in 1919 and the species was only saved from extinction through a breeding

Trailer

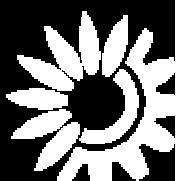

Environmentálny atlas Európy

The Environmental Atlas of Europe is a UNEP-EEA-European Space Agency joint project showcasing communities responding to environmental change across Europe.

A screenshot of the Environmental Atlas of Europe interface. The main title "Environmental Atlas of Europe" is at the top left, followed by "Poland". Below the title is a navigation bar with tabs: Story, Photos, Video, Satellite, and Download. The central image is a photograph of a brown bison lying in a grassy field. To the left of the photo is a map of the Podlaskie region in Poland, showing towns like Brest, Kobryny, and Repki. A scale bar indicates 1.0 Kilometers. The bottom left corner shows a Bing map with a "Road" layer. Logos for the United Nations Environment Programme (UNEP), European Space Agency (ESA), and European Environment Agency (EEA) are at the top right, along with a "credits | disclaimer" link. A close button "x" is also present.
